SHAWN LINDSEY

TECHNICAL WRITER | EDITOR

slindsey001@gmail.com | slindsey001.github.io | Massachusetts, USA

SUMMARY

Technical writer with 10+ years of experience creating developer documentation, API references, release notes, changelogs, and enterprise software documentation. Experienced collaborating with engineering, product, and support teams to deliver clear, scalable documentation using Git-based docs-as-code workflows and AI-assisted tooling.

WORK EXPERIENCE

TECHNICAL WRITER

CData Software — March 2024 - Present

- Document enterprise data connectors, ensuring accuracy, consistency, and reliability across developer-facing workflows.
- Collaborate with developers and product managers to document APIs, authentication systems, and other technical concepts.
- Manage weekly changelog updates covering platform improvements for customers and internal stakeholders.
- Develop AI-assisted workflows and custom agents to improve documentation consistency and scalability.
- Maintain structured, version-controlled documentation using Git and related tools, ensuring precise and reliable updates.
- Improve internal documentation and onboarding materials, reducing ramp-up time for new technical writers.

CONTENT STRATEGIST

Protocol Labs — July 2023 - August 2024

- Developed and executed the editorial strategy for a weekly Web3 newsletter, growing it to 2.77k+ subscribers.
- Researched emerging technologies, partnered with engineering teams, and interviewed project leaders to source stories and technical insight, owning content from ideation through publication.
- Managed the editorial calendar and publishing cadence around project launches and ecosystem milestones.
- Edited technical white papers for clarity, structure, and accuracy, making complex protocol concepts accessible to technical and non-technical readers.

LEAD EDITOR

Coinbase — August 2021 - January 2023

- Led editorial processes for content optimization, contributing to a 30% reduction in the knowledge base.
- Drove content strategy for internal support documentation, improving usability and agent efficiency.
- Produced documentation and change management newsletters for product launches and feature releases.
- Managed content migration to a new CMS, maintaining accuracy and consistency during the transition.
- Conducted quarterly content audits to refine documentation and improve the customer experience.

INFORMATION DEVELOPER

Rocket Software — August 2017 - May 2021

- Created and maintained API guides, user manuals, and release notes for enterprise software.
- Managed versioned content in a docs-as-code workflow using Git, DITA, and Markdown.
- Collaborated with UX and development teams to design interactive tutorials and user flows.
- Provided UX writing support by editing interface text, error messages, and tooltips for clarity and consistency.
- Initiated a Python training group for technical writers, improving team technical fluency among peers.

INFORMATION DEVELOPER

IBM — January 2016 - August 2017

- Developed DITA-based content for product releases, clearly documenting enhancements and new features.
- Participated in UX design planning, reviews, and testing for cloud, mobile, and on-premises products.
- Coordinated with localization teams to prepare technical documentation for global audiences.

SKILLS

Content Strategy | API Documentation | Process Flows | Docs-as-Code

Git | DITA | Markdown | Project Management | Python | SQL | Java

EDUCATION

NORTHEASTERN UNIVERSITY
Master of Science (M.S.) | Technical and Scientific Communication — 2014

UNIVERSITY OF MASSACHUSETTS - BOSTON
Bachelor of Arts (B.A.) | English — 2009
